The VA9203-xxx-xx Series Electric Spring Return Valve Actuators are direct-mount valve actuators. These bidirectional actuators are used to provide accurate positioning on Johnson Controls® VG1000 Series 1/2, 3/4, and 1 in. (DN15, DN20, and DN25) ball valves in Heating, Ventilating, and Air Conditioning (HVAC) applications. A mechanical spring return system provides rated torque with or without power applied to the actuator. The series includes the following control options:

- On/Off, 24 V, or 85 to 264 VAC power
- On/Off and Floating Point, 24 V power
- Proportional, 24 V power, for 0(2) to 10 VDC or 0(4) to 20 mA Control Signal

An accessory crankarm and remote mounting kit are available for applications where the actuator cannot be direct-coupled to the damper shaft. An optional line voltage auxiliary switch indicates an end-stop position or performs switching functions within the selected rotation range.

IMPORTANT: Use these VA9203-xxx-xx Series Electric Spring Return Actuators only to control equipment under normal operating conditions. Where failure or malfunction of the electric actuator could lead to personal injury or property damage to the controlled equipment or other property, additional precautions must be designed into the control system. Incorporate and maintain other devices, such as supervisory or alarm systems or safety or limit controls, intended to warn of or protect against failure or malfunction of the electric actuator.

VA9203-GGx-2Z Series Proportional Actuators

The VA9203-GGx-2Z Series Actuators provide proportional modulation of VG1000 1/2, 3/4, and 1 inch ball valves in HVAC systems that are controlled by an electronic controller or positioner. The actuator responds to 0 to 10 VDC or 2 to 10 VDC control signals. With the addition of a 500 ohm resistor, the actuator responds to a 0 to 20 mA or 4 to 20 mA signal. A 0 to 10 VDC or 2 to 10 VDC feedback signal indicates position and provides support for master-slave applications.

Manual control system override applications are supported through field wiring, and include:

- override to MIN position
- override to MAX position
- override to MIN, MID, and MAX position

The VA9203-GGA-2Z actuators include plenum-rated cables and are specially configured for installation in spaces used for environmental air-handling purposes, other than ducts and plenums, as specified in National Fire Protection Association (NFPA) 70: National Electrical Code section 300.22(C), Other Space Used for Environmental Air. The space over a hung ceiling, when used for environmental air handling purposes, is an example of the type of space for which these actuators are configured.

VA9203-AGx-2Z Series On/Off and Floating Point Actuators

The VA9203-AGx-2Z Series Actuators provide on/off control or modulation of VG1000 1/2, 3/4, and 1 inch ball valves in HVAC systems. Floating point control can be provided from a triac or relay. On/off control can be provided from a manual switch, controller, auxiliary switch from a fan motor contactor, or similar device.

The VA9203-AGA-2Z actuators include plenum-rated cables and are specially configured for installation in spaces used for environmental air-handling purposes other than ducts and plenums as specified in National Fire Protection Association (NFPA) 70: National Electrical Code section 300.22(C), Other Space Used for Environmental Air. The space over a hung ceiling, when used for environmental air handling purposes, is an example of the type of space for which these actuators are configured.

VA9203-Bxx-2 Series On/Off Actuators

The VA9203-Bxx-2 Series Actuators provide on/off control of VG1000 1/2, 3/4, and 1 inch ball valves in HVAC systems. On/off control can be provided from a manual switch, controller, auxiliary switch from a fan motor contactor, or similar device.

Operation

VA9203-xxx-xx Series Actuators provide 95° of rotation. A graduated scale from 0% to 100% and a position indicator provide visual indication of stroke. When power fails during service, the mechanical spring return system returns the valve to the home position.

VA9203-GGx-2Z Series Proportional Actuators

The VA9203-GGx-2Z Series uses a brushless DC motor controlled by a microprocessor. The microprocessor drives the motor at constant speed, independent of torque. The microprocessor also monitors the brushless DC motor's rotation to prevent damage to the actuator in a stall condition. The actuator can be stalled anywhere within its rotation range without the need for mechanical end switches. Power consumption is reduced in the holding mode.

The VA9203-GGC-2Z version is provided with one integrated, line-voltage-capable auxiliary Single-Pole, Double-Throw (SPDT) switch. The switch point is independently and continuously adjustable throughout the full range of actuator stroke. The auxiliary switch is double-insulated so an electrical ground is not required.

VA9203-AGx-2Z Series On/Off and Floating Point Actuators

The VA9203-AGx-2Z Series uses a brushless DC motor controlled by a microprocessor. The microprocessor drives the motor at constant speed, independent of torque. The microprocessor also monitors the brushless DC motor's rotation to prevent damage to the actuator in a stall condition. The actuator can be stalled anywhere within its rotation range without the need for mechanical end switches. Power consumption is reduced in the holding mode.

The VA9203-AGB-2Z version is provided with one integrated, line-voltage-capable auxiliary SPDT switch. The switch point is independently and continuously adjustable throughout the full range of actuator stroke. The auxiliary switch is double-insulated so an electrical ground is not required.

VA9203-Bxx-2 Series On/Off Actuators

The VA9203-Bxx-2 Series uses a DC brush motor controlled by analog electronics. The actuator can be stalled anywhere within its rotation range without the need for mechanical end switches. Power consumption is reduced in the holding mode. Two different voltage ratings are available for on/off actuators.

- VA9203-BGx-2: AC 24 V 50/60 Hz or DC 24 V power
- VA9203-BUx-2: AC 85 to 265 V 50/60 Hz power

The VA9203-BUx-2 actuators are double-insulated so an electrical ground is not required. The VA9203-BxB-2 versions are provided with one integrated, line-voltage-capable auxiliary SPDT switch. The switch point is independently and continuously adjustable throughout the full range of the actuator stroke. The auxiliary switch is double-insulated so an electrical ground is not required.
